

Automic Release Automation 12.0.8

Component	Description
Analytics.On.Premise	Update of some third-party libraries to prevent any future potential security vulnerabilities - spring-boot in v1.5.20 - tomcat-embed-core in v8.5.40
Automation.Engine	<p>SNMP Agent does not work</p> <p>Installing AE Web Service 12.0 fails with SAP Netweaver 7.40</p> <p>Forecast calculation always uses current ERT.</p> <p>Error when opening the Advanced Options for a particular AS/400 Agent</p> <p>DB-Unload Utility causes error message in WP logs</p> <p>Path file count does not count files on object level</p> <p>AS/400 Agent does not delete own Job and Report files after job completion</p> <p>Changes to Maximum Executions apply only after first generation</p> <p>Java API returns workflow tasks in wrong order, when tasks have no connection and END object has not the biggest Inr</p> <p>Generic Jobs behaviour documented</p> <p>AS/400 Agent does not delete the source file after file transfers on the QSYS file system</p> <p>PREP_PROCESS_FILENAME returns the message "This function has not yet been implemented."</p> <p>DB Change utility changes the key in a static variable</p> <p>Script functions allowed in :SWITCH, but not in :CASE</p> <p>zOS Agent doesn't ignore logoff cards, job ends with status disappeared.</p> <p>Documentation of EXECUTE_ON_LOST (UC_HOSTCHAR_DEFAULT) is wrong</p> <p>Wrong generation of filenames with partially qualified file transfers.</p> <p>z/OS Agent crashes during job submit process</p> <p>Prompt buffer bigger than 2 kilobytes resulted in a work process crash</p> <p>Status ENDED_OK_OR_INACTIVE is missing in workflow properties of external dependency</p> <p>Linux Job Report not accessible when a job is running.</p>
Automic.Web.Interface	<p>Numeric User IDs are not displayed in the Administration perspective.</p> <p>LDAP Features in AWI are not visible if OBJECT_ACCESS_CLIENT_ZERO (UC_SYSTEM_SETTINGS) is set to "N"</p> <p>The Child Task Executions view shows "No execution entries available" if the number of entries in the list exceeds 1000</p> <p>An exception is shown when viewing a report if the Agent is not available</p> <p>Expanding a sub Task in a workflow inside the Process Monitoring causes an unexpected error</p> <p>User settings not saved in the Agents & Agent Groups sections of the Administration Perspective</p> <p>Leaving the Queue field empty does not default to CLIENT_QUEUE as stated in the documentation</p> <p>:READ script elements with default values greater than 10 numeric values throw a Java exception</p>
Automic.Web.Interface.SAP.Forms	SAP job parameters are corrupted when edited in AWI 12.2
LDAPSync	LDAPSync hangs when using Security LDAP connection.
Package.Agent.2.Agent	All Agent_2_Agent actions have been modified to comply with the quality standards.
Package.Bond	Action DM Add Deployment Target to Component cannot assign deployment target to component if their custom type unmatched
Package.DM	<p>Security related update included.</p> <p>Security related update included.</p>
Package.Email	Email attachment decoding has not been handled properly.
Package.Filesystem	Archives that include files with German umlaute in their names are not processed properly
Package.FTP	Get file by using wildcard does not work
Package.INI	Security related update included.
Package.JDBC	<p>Security Fix to mitigate Log4J vulnerability.</p> <p>Security related update included.</p>
Package.Log	An issue about Actions are put into after install pack has been fixed
Package.RA.REST	Unable to set Connection Timeout (s) and Read Timeout (s) via promptset Advanced connection settings
Package.SMB	Problem of failing copy large file from server has been fixed.
Package.Smoke.Web	Fixed an issue with Windows authentication related to IIS.
Package.Windows	An issue has been fixed with wrong filter used with PREP_PROCESS_REPORT in Post Process of Get Environment Variable action.
Package.Windows.Service	Cannot stop service if service name contains space
RA.FTP	FTP File Transfer does not work for zlib compression
RA.Web.Service.REST	<p>Security related update included.</p> <p>Security related update included.</p>
RA.Web.Service.SOAP	<p>Security related update included.</p> <p>Starting "SOAP Migration Tool" error is thrown</p>
Release.Manager	Object null reference exception caused when importing an execution.
Restart.Plus	Handling data set resides on Extended Address Volumes (EAV).

Analytics.On.Premise

Update of some third-party libraries to prevent any future potential security vulnerabilities - spring-boot in v1.5.20 - tomcat-embed-core in v8.5.40

2019-04-26

Update of some third-party libraries to prevent any future potential security vulnerabilities

- spring-boot in v1.5.20
- tomcat-embed-core in v8.5.40

Components:

- Analytics Backend

Fixed Versions:

- Analytics.On.Premise 1.0.5

Fixed In / Related Files

- Automation.Platform / Analytics / Analytics.On.Premise_Analytics.Backend_1_0_5+build.3860.zip

Automation.Engine

SNMP Agent does not work

2019-01-29

A problem has been fixed where the SNMP Agent did not work in an environment without IP V6.

Components:

- SNMP

Fixed Versions:

- Automation.Engine 12.3.0
- Automation.Engine 12.2.2
- Automation.Engine 12.1.5
- Automation.Engine 12.0.8

Fixed In / Related Files

- Automation.Platform / Automation.Engine_SNMP_12_0_8+build.1556211903212.zip

Installing AE Web Service 12.0 fails with SAP Netweaver 7.40

2018-03-15

A problem has been fixed where installing the Automation Engine Web Service in SAP Netweaver 7.40 fails with the following error message:
"java.lang.UnsupportedClassVersionError". The error was due to SAP Netweaver 7.40 using SAP JVM 6.1, while the uc4.jar contained in the Web Service was compiled against Java 7. In order to support SAP Netweaver 7.40, the compile level of uc4.jar has been changed to Java 1.6 in Version 12.0. This fix is valid for Version 12.0 only. Version 12.1 and higher require at least Java 8.

Components:

- WebService

Fixed Versions:

- Automation.Engine 12.0.5

Fixed In / Related Files

- API / Automation.Engine_WebService_12_0_5+build.1525072017524.zip

Forecast calculation always uses current ERT.

2018-09-04

Forecast always uses the current ERT for forecast calculations. If a fixed value is set, it is used for further task executions but not for the forecast.

Components:

- Documentation Guides

Fixed Versions:

- Automation.Engine 12.1.3
- Automation.Engine 12.0.7
- Automation.Engine 12.2.1
- Automation.Engine 12.3.0

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Documentation_Guides_12_0_7+build.1551976303810.zip

Error when opening the Advanced Options for a particular AS/400 Agent

2018-10-30

A problem has been fixed where opening the Advanced Options for a particular AS/400 Agent resulted in the following error in the AWI: "XPROPERTIES_HOST(GET)".

Components:

- Agent AS400

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Agent_AS400_12_0_7+build.1545379430905.zip

DB-Unload Utility causes error message in WP logs

2019-03-26

A problem was fixed where the DB-Unload used an improper SQL statement for a DB/2 database to delete entries from the DIVDB table causing an error message in the WP logs.

Components:

- Utility

Fixed Versions:

- Automation.Engine 12.3.0
- Automation.Engine 12.1.5
- Automation.Engine 12.0.8
- Automation.Engine 12.2.3

Fixed In / Related Files

Path file count does not count files on object level

2018-10-22

A problem has been solved where path file count did not count files on object level.

Components:

- Agent AS400
- AutomationEngine

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Agent_AS400_12_0_7+build.1545379430905.zip

AS/400 Agent does not delete own Job and Report files after job completion

2018-10-10

A problem has been fixed where the AS/400 Agent does not deletes its own Job and Report files after the job completes. This issue arose due to changes in the AS/400 Agent in V12, where the Agent treats all path as IFS paths. The handling of QSYS path names was disabled.

Components:

- Agent AS400

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Agent_AS400_12_0_7+build.1545379430905.zip

Changes to Maximum Executions apply only after first generation

2018-10-02

Changes to Maximum Executions are active only after the first generation and do not apply to Jobs that are already running

Components:

- Documentation Guides

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.2.1
- Automation.Engine 12.3.0

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Documentation_Guides_12_0_7+build.1551976303810.zip

Java API returns workflow tasks in wrong order, when tasks have no connection and END object has not the biggest Inr 2019-04-23

Java API returns workflow tasks in wrong order, when tasks have no connection and END object has not the biggest Inr

Components:

- Application Interface

Fixed Versions:

- Automation.Engine 12.3.0
- Automation.Engine 12.1.5
- Automation.Engine 12.0.8
- Automation.Engine 12.2.3

Fixed In / Related Files

AS/400 Agent does not delete the source file after file transfers on the QSYS file system 2018-10-10

A problem has been fixed where the AS/400 Agent does not delete the source file after a successful file transfer, when the "Erase Source File" option is activated. This issue only affected the QSYS file system.

Components:

- Agent AS400

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2
- Automation.Engine 11.2.10

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Agent_AS400_12_0_7+build.1545379430905.zip

PREP_PROCESS_FILENAME returns the message "This function has not yet been implemented."

2018-12-10

An error has been fixed where the AS400 agent could not process the function PREP_PROCESS_FILENAME and returned the message "This function has not yet been implemented."

Components:

- Agent AS400

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Agent_AS400_12_0_7+build.1545379430905.zip

DB Change utility changes the key in a static variable

2018-12-27

A problem has been fixed where the DB Change utility changed the key value in a static variable. According to the documentation, this should not be possible.

Components:

- Utility

Fixed Versions:

- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2
- Automation.Engine 12.0.8

Script functions allowed in :SWITCH, but not in :CASE

2018-12-27

An issue in the documentation of the script statements :SWITCH and :CASE has been corrected. The documentation now states that :SWITCH allows the use of script functions, in addition to script literals and script variables, while :CASE allows script literals, script variables or complex expressions.

Components:

- Documentation Guides

Fixed Versions:

- Automation.Engine 12.0.7
- Automation.Engine 12.1.4
- Automation.Engine 12.3.0
- Automation.Engine 12.2.2

Fixed In / Related Files

- Automation.Platform / Automation.Engine_Documentation_Guides_12_0_7+build.1551976303810.zip

zOS Agent doesn't ignore logoff cards, job ends with status disappeared.

2019-01-17

A problem has been fixed where the zOS Agent does not ignore logoff cards in the JCL. The zOS Job ends with status disappeared.

Components:

- Agent MVS

Fixed Versions:

- Automation.Engine 12.3.0
- Automation.Engine 12.2.2
- Automation.Engine 12.1.5
- Automation.Engine 12.0.8

Fixed In / Related Files
